To Autotech Systems,

We purchased the TreadPlus 9000AIO aligner and 14K Lb 4 Post Alignment lift in January of 2017 and have had great success with your products.

We had not performed alignments previously, so this was a learning experience. However, with some guidance from your Tech Support team in the first few days and the overall simplicity of the aligner, we perform alignments in 10-30 minutes!!

Alignments are a new revenue and sales source for us since the purchase. We average 3-4 alignments a day as well as the additional mechanical repairs that we uncover during the alignment pre-check.

Our customer traffic has increased with this new service as well.

We would definitely recommend Autotech Systems and the TreadPlus alignment system to other repair shops due to lower investment, ease of use, customer service, and better return on our investment.
